

Our Forests New Future

Our forests used to be vast and full of wildlife.

Habitat loss is the major cause of species extinction.

Almost 50% of NSW's forest mammals are now listed as threatened including the Koala.
Stop woodchipping our wildlife!

Logging our forests wastes our money.

The logging industry lost \$85 million in just 3 years. Our taxes were used to cover this loss. **Money doesn't grow on trees!**

32% of Australia's entire emissions reduction target could be reached if we STOPPED LOGGING public forests in NSW

Our forests need a new future

Let's back a winner!

Tourism is the largest employer in regional communities. **80% of international visitors to NSW come to see nature.**

Logging cuts down our options.

Unlike native forest logging tourism makes money. **22 million nature based visitors spent \$14.6 billion in 2014.**

These are OUR forests. Let's axe logging
